

EMPOWER Labs

Session 7: Offering and Sales Excellence

Today, we'll cover the "O" in EMPOWER – **Offering & Sales Excellence** – the core process that converts interested prospects into paying customers.

Program Timeline

Milestones: Where You Should Be at This Point

— **Ran the Assessment (Financial Performance Management)**

— **Create the Level 1 & 2 SOP (Financial Performance Management) (Optional)**

3

— **Create an Interactive Artifact with Claude (Optional)**

4

— **Use Claude as Your Fractional CFO (Optional)**

Poll: Have you completed the exercises up until this session? (excl. optional exercises)

3 Layers of Business Process

The 6 Stages of the Customer Lifecycle (Core Processes)

What You'll Get Out of This Session

1. Positioning
Your Offering

2. Generating
Leverage with
Sales Calls

3. Increasing
Conversions
with Lead
Magnets &
Autoresponders

4. Accelerating
Your Proposal
Process

Part 1: Positioning Your Offering

The EMPOWER Connection

Lead to Sale effectiveness directly impacts business valuation through:

- Predictable revenue generation
- Scalable sales processes independent of owner involvement
- Higher conversion rates and shorter sales cycles
- Systematic objection handling and proposal management
- Data-driven sales optimization

Remember the Golden Ratio: Customer Value ÷ CAC

i All benefit from an internal sales team!

The Value Equation

Dream Outcome × Perceived Likelihood of
Achievement

Time Delay × Effort & Sacrifice

📌 according to Alex Hormozi

Mapping the "Price to Problem" Landscape

- 1 What problem are you and others solving?**
- 2 What are other people charging to solve the problem you're solving?**
What are various monetization methods in your market?

Offering Types

Every offering falls somewhere on this spectrum:

Considered Buy

ERP System (\$500k) → New car (\$30k) →

Impulse Buy

Online course (\$500) → Coffee (\$5)

Most business owners design their sales process based on how THEY buy, not how their CUSTOMERS buy, including:

- Price impact on buyer
- Number of decision makers
- Consequences of being wrong
- Research required

Different Positions Require Different Sales Strategies

Critical Question: **Where does YOUR offering fall on this spectrum?**

Factor	Considered	Impulse
Price	Over \$5,000	Under \$500
Decision-makers	3+ people	1 person
Timeline	Weeks/months	Minutes/hours
Primary concern	What if this fails?	Will this work?
Buying motivation	ROI/risk mitigation	Emotional

Your Sales Process Must Match Your Position

Considered-Leaning

- 1 Educational content library
- 2 Multiple touchpoints (demos, trials)
- 3 Risk mitigation (guarantees, support)
- 4 Stakeholder involvement tools

✗ Avoid: High-pressure tactics, artificial urgency

Impulse-Leaning

- 1 Same-day response capability
- 2 Emotional triggers (convenience, status)
- 3 Social proof emphasis
- 4 Easy payment options

✗ Avoid: Long nurture, detailed ROI analysis

Diagnosing Your Position

To align your sales process with your offering's true position, use these diagnostic tools:

1 Price Test

What % of prospects need to "think about" your pricing?

- <20% = Impulse-leaning
- >60% = Considered-leaning

2 Timeline Test

Average time from first contact to final decision?

- <1 week = Impulse
- >1 month = Considered

3 Stakeholder Test

How often do other decision makers get involved?

- Rarely = Impulse
- Usually = Considered

Misalignment Red Flags

Too "Impulse"

- High refund rates
- Pressure complaints
- Price-based competition

Too "Considered"

- Prospects going cold
- Over-education
- Unnecessarily long sales cycles

ACTION: Identify ONE adjustment to better match your spectrum position

Poll: Where are you on the impulse buy vs. considered purchase spectrum?

Part 2: Generating Leverage with Sales Teams

What is an Internal Sales Team?

Online-Only Sales

Automated Funnels

Lead capture systems drive prospects to self-service purchase options.

No Human Touch

Customer interaction begins only after purchase is complete.

 Success hinges on traffic quality, conversion rates, and appropriate price points.

Internal Sales Team

Human Connection

Sales professionals qualify leads and conduct personalized discovery.

Custom Solutions

Tailored proposals address specific client needs before purchase.

 Success depends on sales skills, process efficiency, and relationship-building ability.

SDR/Setter

Qualifies incoming leads and schedules discovery appointments.

Account Executive

Conducts discovery calls, presents solutions, and closes deals.

Sales Manager

Coaches team members, manages pipeline, and forecasts revenue.

Should You Make the Switch?

The Case For Internal Sales Teams

Current Situation

- High traffic, low conversions
- Prospects asking questions before purchase
- Competing against human sales teams
- Complex/custom solutions
- High-value transactions
- Long consideration periods

Why Sales Team Helps

- Personal touch increases close rates
- Discovery calls address specific concerns
- Levels the competitive playing field
- Tailored presentations
- ROI justifies personal attention
- Relationship-building accelerates decisions

The Weak Case for Internal Sales

If you have...

- Healthy online conversion rates
- Low-touch, commodity products
- Price-sensitive market
- Limited lead volume
- Seasonal/inconsistent demand

Stick with online because...

- Don't fix what's working
- Humans add unnecessary cost
- Sales overhead increases prices
- Can't keep team busy
- Fixed cost vs. variable revenue

How to Generate Leverage with Sales Calls

Current State

-  Salespeople take notes during calls while trying to build rapport.
-  Manually update CRM after calls, often missing critical details.
-  Write follow-ups from scratch for each prospect.
-  Managers review calls randomly with no systematic approach.

The Waste

30+ Minutes Admin time wasted after each sales call.	% Data Loss Of conversation insights never make it to your CRM.
Hours of delays Average follow-up time, reducing conversion rates.	0 Leverage Systematic improvement from call intelligence.

Every Call Becomes Automated Intelligence

Sales Call

Every conversation becomes a data goldmine without manual effort.

AI Processing

Intelligent algorithms extract key insights from dialogue in real-time.

Automated Actions

System triggers personalized workflows based on conversation content.

Automatic CRM Updates

- Perfect call notes with zero admin time
- Lead scoring based on conversation signals
- Pain points and objections tagged automatically

Instant Follow-Ups

- Personalized emails with call highlights
- SMS sequences triggered by specific pain points
- Custom proposals generated from identified needs

Scale Your Sales Management

Automated Coaching

- AI-powered call quality scoring with custom rubrics
- Real-time coaching alerts during live conversations
- Performance tracking without tedious manual reports

Pipeline Intelligence

- Automated pipeline reviews that identify bottlenecks
- Deal risk scoring based on conversation signals
- Forecast accuracy improvement through predictive analytics

Massive Capacity Gains

Sales Team Impact

More Sales Calls

Eliminate administrative burden. Reps focus on what matters: selling.

Same-Day Feedback

Instant coaching replaces delayed weekly reviews. Continuous improvement cycle.

CRM Accuracy

Flawless data capture without manual entry. No more missing insights.

Management Leverage

15:1

Manager-Rep Ratio

Dramatically expanded span of control through automation.

24/7

Coaching Coverage

AI-powered reviews identify coaching opportunities automatically.

100%

Data-Driven Insights

Performance patterns emerge from comprehensive conversation analytics.

Implementation Strategy

Choose Tools

Select your conversation intelligence platform:

- Gong for comprehensive sales insights
- Chorus for team coaching capabilities
- **Rev** for accurate transcription
- Otter for real-time meeting notes

CRM Integration

Connect your chosen tool with existing CRM system.

Create custom scoring rubrics based on your sales process.

AI Assistance

Ask your LLM: *"How do I integrate [notetaker] with [CRM] to auto-update lead scores and trigger follow-up sequences?"*

Technical Setup

Implementation requires some custom code.

Most CRM platforms provide APIs for integration.

ROI Impact

System pays for itself through call capacity gains alone.

High priority if you have established CRM and 3+ salespeople.

Sales Scripts & Templates

"I'm going to record/transcript my best sales conversations. Learn my:

- *Discovery question sequence*
- *Objection handling approach*
- *Closing methodology*
- *Proposal structure*

Create a rubric to score each of these areas, personalized to my business. Then help me train others to replicate this approach and create consistent messaging for different scenarios."

AI for Sales Training & Reviews

Role Playing with AI

Customer Simulation

Use ChatGPT or Gemini voice to simulate prospect conversations.

Scoring System

Paste in your sales rubric to ensure AI follows your unique process.

AI-Powered Reviews

Pipeline Intelligence

Have AI walk through prospects with you using recorded call data.

Call Performance

AI flags low-scoring interactions for managers without direct intervention.

Part 3: Increasing Conversions with Lead Magnets & Autoresponders

The Autoresponder Opportunity

Your autoresponders are probably terrible (and that's a huge opportunity)

Most Autoresponders Today

Generic "thanks for signing up" messages that add no value

No connection to your actual sales process or buyer journey

Missed qualification opportunities that leave money on the table

The AI-Powered Upgrade

Interactive engagement tools addressing specific buyer objections

Automatic lead scoring integration that prioritizes hot prospects

Custom segmentation based on actual prospect behavior

Bottom line: Every autoresponder email should make prospects more likely to buy AND give you better sales intelligence.

Interactive Elements + Smart Automation

✗ REPLACE THIS: "Thanks for downloading our guide. Here's what we do..."

With interactive elements that qualify and segment:

Calculators

- ROI calculators, pricing estimators, savings calculators
- Reveals budget capacity and urgency level

Quizzes

- "What's your biggest challenge?" "How ready are you?"
- Identifies buyer persona and decision timeline

Custom GPTs

- "Ask our AI about your specific situation"
- Captures detailed qualification data through conversation

Assessments

- Business health checks, readiness scores
- Determines sales-readiness and pain severity

Result: Every interaction should tell you more about prospect fit and buying readiness.

Let Technology Do the Qualification & Routing

The smart automation layer transforms raw interactions into sales intelligence, qualifying leads before your team touches them.

Automatic Lead Scoring

-  **Calculator inputs** → Budget/authority scores
-  **Quiz responses** → Pain level/urgency scores
-  **Assessment results** → Overall readiness scores
-  **GPT conversations** → Detailed qualification notes

Smart Segmentation & Routing

80–100

High Score

Immediate sales team
alert + calendar link

60–79

Medium Score

Demo sequence +
calendar in email

40–59

Low Score

Educational nurture
track,
calendar later

<40

Poor Fit

General newsletter, no
sales resources

Integrate, Personalize & Accelerate Sales

Transform your autoresponders into sophisticated sales tools that **create measurable business impact** across your entire tech stack.

CRM Integration Benefits

Every interaction automatically enriches contact records with qualification data.

- Sales team sees prospect pain points before first call
- Lead source tracking identifies highest-converting magnets
- Pipeline reports incorporate engagement scores for forecasting

Conditional Content

Deliver hyper-relevant experiences based on prospect behavior.

- Unique email sequences triggered by specific quiz answers
- Calendar links appear only for qualified prospects
- Industry-specific case studies matched to prospect profile
- Custom landing pages

Sales Team Benefits

Empower your team with pre-qualified, educated prospects.

- Replace cold discovery calls with informed conversations
- Prioritize follow-up using engagement scoring
- Increase show rates with self-scheduled appointments
- Shorter sales cycles as they are pre-qualified/pre-educated

Lead Magnets as Powerful Reengagement Tools

Traditional Approach

Demo → No decision → Multiple follow-ups →
Prospect goes cold

Magnet Strategy

Demo → Objection-specific magnet → Engagement
spike → Sales conversation

OR

Budget concerns → Business case magnet →
Internal champion → Decision acceleration

 Then use them as actual lead magnets in your Market to Lead process as well!

Part 4: Accelerating Your Proposal Process

Your Proposal Process Limits Your Growth

Current Reality

- 2-8 hours per custom proposal
- Bidding on only 20-50% of opportunities
- Losing deals to faster competitors

Opportunity Cost

- Missing 50-80% of potential bids
- Inconsistent profit margins
- Sales capacity wasted on proposal creation

Bottom Line: Your proposal speed determines your market share.

Train AI on Your Best Proposals: Bid 3x More

Training Your AI

- Feed AI your highest-converting proposals
- Include winning pricing and messaging
- Establish margin targets and pricing rules

The Transformation

- 5-10 proposals weekly becomes 10-15+
- Same-day or same-hour delivery
- Consistent quality matching your best work

Smart Pricing Based on Conversion Data

Dynamic Pricing Rules

- High-engagement prospects: Standard pricing
- Rush requests: 20-40% premium for urgency
- Peak demand periods: 10-20% premium
- High-availability periods: 5-15% discount

AI Integration

Automatically adjusts pricing based on:

- Prospect qualification scores
- Your current pipeline and capacity
- Historical win rates for similar projects

The 7 Steps of Program Implementation

1

Gaining exposure hours

Get enough exposure to AI to start building your intuition

2

Completing the assessments & updating your Master Prompt

Gain holistic ratings and targeted recommendations for where to focus next

3

Creating Level 1-2 SOPs of core processes

Map the high-level of your most important existing process

4

Create an implementation plan and next steps

Drawing on your new context-enhanced AI strategist

5

Review and correct SOPs with your team

Map your processes in more detail

6

Create AI-first SOPs

Work with AI to streamline, improve, and prepare your processes for AI enhancement

7

Experimenting with other use cases and tools for AI

Expand your horizons and explore other ways to use AI in your organization

Q&A

Your turn to ask your questions!

Your Next Steps

01

Run the Assessment (Lead to Sale)

Assess your organization's performance, gauge the dependence on the owner, and identify areas for improvement.

02

Create the Level 1 & 2 SOP (Lead to Sale)

Create a map of the process (Level 1) as well as blueprints for each functional area within the process (Level 2)

Live Session 8: Workforce & Leadership

Monday, Feb 23rd at 10 am PT / 1 pm ET
