

Session 9: Naming Your Product or Service

Key Points...

1. Naming - The Ultimate Leverage:
 - Nowhere do you get so much "bang for your buck" than choosing a name for your business, your product or your service.
2. Create a name that's impossible for customers to forget.
 - Don't focus on creating a name that's "nice" or "easy to remember."
 - Instead, focus on creating a name that's impossible to FORGET.
3. The mind remembers name by SOUND, not by sight.
 - Names are sounds before they are printed words - so focus on the SOUND primarily.
 - Repetitive sounds and rhythmic sounds win in this domain - so use them.
4. Avoid "Cute" or "Funny" names.
 - Spending money is serious business - and most people don't want to laugh when they're doing it.
 - Rarely does a cute or funny name work - so avoid them.
5. Use names that promise results, benefits, and/or solutions if possible.
 - Most people think that a name is something very different from their "other marketing."
 - Not so - use everything you've learned so far to create a name that promises a BENEFIT.
6. Rhythm makes names much more "sticky" in the mind.
 - We have a system called the "phonological loop" that acts as an auditory buffer.
 - Use repetitive and rhythmic sounds to keep your name bouncing around LONGER.
7. Do use and include:
 - Alliteration
 - Rhyme
 - Rhythm
 - Power Associations
8. Favorite Name Examples:
 - Coca Cola
 - 3 Day Blinds
 - YouTube
 - Bed, Bath & Beyond
9. Names that I've created:
 - Double Your Dating
 - Self-Made Wealth
 - Wake Up Productive
