

How To Create “Content” That Generates Traffic, Leads And Customers

“Content” is the general word that is used online to describe articles, videos, interviews, etc. that carry your message. As internet marketing evolves, it continues to combine and integrate “content” with “marketing” - to the point where the lines are getting blurred. One of the most important skills you can develop is the ability to create articles, videos and other content that draws prospective customers in, teaches them valuable techniques, builds credibility and trust, then attracts them to your website and turns them into BUYERS.

Start With An “Emotional Hot Button Issue”

Create a title that involves one of the Emotional Hot Buttons you’ve identified with your other exercises.

Pull The Prospect Into Your Content

Describe their problem or desired outcome better than they can.

Next, Teach A Simple Technique Or Solution

Teach them a “magic pill” technique that shows them instant results.

Finally, Invite The Prospect To Get More Free

Promise 3x-10x the value by coming to get a free report, video or product. Promise benefits.

Tell Them Exactly What To Do

Give them specific instructions on how to get their “free stuff.” Tell them what to expect next.
