

Session 2: 12 Key Marketing Mindsets

Key Points...

1. Why learn "Marketing Mindsets?"
 - How you think about an area of business or success determines how you approach it.
 - If you have the wrong ideas about Marketing, or the wrong expectations, you are very likely to make serious mistakes.
2. Marketing Mindset #1: Marketing is the KEY money-maker in your business.
 - Most activities inside a business cost money, instead of making money. Of the things that do make money, marketing makes the most money. It re-prioritizes what you need to do every day.
3. Marketing Mindset #2: Marketing is not something you do once - it's an ongoing PROCESS.
4. Marketing Mindset #3: Marketing begins with understanding the needs and wants of your customer. It doesn't begin with advertising, putting up a website, etc. It begins with understanding your customer.
5. Marketing Mindset #4: Customers hate to be sold - but they LOVE to buy.
 - Instead of convincing, give them what they need to convince themselves to buy. Allow your customers the pleasure of finding a solution to their problem... so they can love to buy.
6. Marketing Mindset #5: Marketing is about triggering ACTION.
 - Marketing is "customer getting." Human beings don't make most decision consciously, although it appears to the decider that they are. Appeal to the Lizard and Chimpanzee so they have what they need to make the decision. Don't cross your own ethical boundaries. Only use these tools when it's in the best interest of your prospects to do so.
7. Marketing Mindset #6: Everything is a test. EVERYTHING.
 - We like to think that what we're doing is going to work, for sure. This causes us to continue unsuccessful marketing efforts, and compound our failure rather than compound our success. If you take the mindset that everything is a test, you watch what you do to see if it's working. You have the expectation that many things won't work. But the ones that do work get used over and over again, and become winning (and very profitable) formulas.
8. Marketing Mindset #7: Run your marketing like a business.
 - Running something like a business is about taking it seriously, measuring it, and making sure it actually works. Most people run their marketing by intuition, not like a business.
9. Marketing Mindset #8: Understand your Prospective Customer better than they understand themselves.
 - This is about diving deep into their desires, fears, fantasies, etc. Learn the words they use to describe their situation. When you understand them better than they understand themselves, you'll be able to develop deep relationships with them and offer them many products.

10. Marketing Mindset #9: Successful marketing is ultimately a successful marketing system and sequence.
 - You want to build a marketing system, so a customer can come to you and get a consistent experience of learning about your services, why they need to purchase from you, the upsells you offer, etc.
11. Marketing Mindset #10: The success of your marketing is in proportion to the perceived value that you create for customers.
 - It's not enough to have a product and say, "come and buy my product." What customers want to make a decision is massive value. You need to translate the value of what you're offering. You need to connect the dots and show them exactly how you'll solve their problem.
12. Marketing Mindset #11: "I am now a Marketer, not just a business owner."
 - When people ask you what you do, answer "I'm a marketer, and I own a business."
13. Marketing Mindset #12: Find customers where they are, not where you want them to be - and don't expect them to find you.
 - Find them physically and psychologically. Behave in a way that makes them comfortable with you because you're meeting them where THEY are. Expecting people to find us is leftover from the job mindset.
